To: hsienching.chung@gmail.com

You have just been endorsed to submit papers to the arXiv subject class
eess.SY (Systems and Control). To continue the submission process
visit:
https://arxiv.org/submit/

Please note that endorsement is a necessary but not a sufficient
condition to have papers accepted in arXiv. arXiv reserves the right
to reject or reclassify any submission.

The arXiv.org e-print archive is fully automated and processes over 500
new submissions per day. To help us keep the process running smoothly
and efficiently please check your submission carefully for mistakes,
typos and layout issues. Once you have submitted your work please check
your account frequently for verification messages and other
communication from arXiv.

Contacting arXiv
We have provided extensive help pages to guide you through the process
and to answer the most common questions. If you have problems with the
submission process please contact us here:
https://arxiv.org/help/contact. We aim to assist submitters within one
business day but during times of high volume or maintenance work we may
be slightly delayed in our response.

Thank you for your cooperation.
